

the member 4 could be telescopically fitted into the front chair legs, and be pulled out when required to support the back 2 and seat 3. The members 5 and 6 when positioned above the seat 2 can be used as a stand for a film projector or as a work table.

WHAT WE CLAIM IS:—

1. A convertible chair/table, including a chair seat and back pivotally connected together and carried by a main frame by the back being pivotally connected to the top of a back member of the main frame; and a support frame comprising a support member mounted at the front of the main frame and carrying a transverse member at its free end, the support frame being movable between a first position in which the support member is below the chair seat when the chair/table is in use as a chair, and a second position in which the support member extends above the chair seat position and the transverse member is substantially horizontal, the chair seat and back being movable into co-planar horizontal positions supported by the support frame, when in its second position, and the main frame, to constitute a table surface.

2. A chair/table as claimed in Claim 1, wherein the support member of the support frame is pivotally connected to the tops of the front legs of the main frame.

3. A chair/table as claimed in Claim 1, wherein the support member is telescopically fitted into the front legs of the main frame.

4. A chair/table as claimed in Claim 2 wherein the support frame can be positioned in front of the front legs of the main frame to form a support for the legs of a person sitting in the chair.

5. A chair/table as claimed in any one of the preceding Claims, wherein a spring clip is provided to secure the seat to the main frame when the chair/table is in use as a chair.

6. A chair/table substantially as herein described with reference to the accompanying drawings.
